ADAPTIVE CONTROL

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Adaptive stabilisation of extended nonlinear output feedback systems p268
Control of free length when coiling a helical spring p239

ARTIFICIAL INTELLIGENCE

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Application of parsimonious learning feedforward control to mechatronic systems p318
Fault detection and accommodation in dynamic systems using adaptive neuro-fuzzy systems p283
Neuro-fuzzy mixture of experts network parallel learning and model construction algorithms p456
Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169

ASYNCHRONOUS MACHINES

Cascade nonlinear observers: application to an experimental induction motor benchmark p509
Intelligent backstepping control for linear induction motor drive p193
Method for designing PI-type fuzzy controllers for induction motor drives p61
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217

AUTOMATA THEORY

Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169

BIOMEDICAL ENGINEERING

Design of feedback controllers for paraplegic standing p97

CLOSED LOOP SYSTEMS

Analysis and design of haptic telerobotic system p306
Automotive engine speed control: A robust nonlinear control framework p81
Conjecture about the absolute stability problems of SIMO and MISO systems and a proof of its deduction p299
Discrete control for a computer hard disk by using a fractional order hold device p117
Genetic algorithm approach to designing finite-precision controller structures p377
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245
Neural network-based tracking control for robotic systems using only position feedback p25
New computational procedure to the pole placement problem by static output feedback p466
Predictive PID controllers p478
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust PI and PID controller design in delta domain p350
Robust root clustering of interval plants with first-order compensators p315
Robust stability of singularly perturbed state feedback systems using unified approach p391

COMPUTATIONAL COMPLEXITY

Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169

CONTROL APPLICATIONS

Constructing networks of continuous-time velocity-based models p397
Control of free length when coiling a helical spring p239
Temperature control in liquid helium cryostat using self-learning neurofuzzy controller p233

CONTROL EQUIPMENT

Improved proximate time-optimal sliding-mode control of hard disk drives p516
Modelling study, analysis and robust servo control of pneumatic cylinder actuator systems p35
Tuning of PID controllers with fuzzy logic p1

CONTROL SYSTEM ANALYSIS

Analysis and design of haptic telerobotic system p306
Analytic predictive controllers for nonlinear systems with ill-defined relative degree p9
Automotive engine speed control: A robust nonlinear control framework p81
Box-Jenkins model LQG controller: design and performance p419
Computing frequency response gains of linear continuous-time periodic systems p291
Conjecture about the absolute stability problems of SIMO and MISO systems and a proof of its deduction p299
Design of feedback controllers for paraplegic standing p97
Discrete control for a computer hard disk by using a fractional order hold device p117
Dynamic position feedback stabilisation of multi-degrees-of-freedom linear mechanical systems subject to nonsmooth impacts p488
Extreme stability margins of interval systems p70
Genetic algorithm approach to designing finite-precision controller structures p377
Global output regulation with minimum information of uncertain nonlinear systems subject to exogenous signals p203
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Integrated approach to dynamical order assignment in linear descriptor systems p329
Intelligent backstepping control for linear induction motor drive p193
Inversion of matrices and matrix functions as a nonlinear discrete system: stability and sensitivity analysis p43
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245
Method for designing PI-type fuzzy controllers for induction motor drives p61
Modelling study, analysis and robust servo control of pneumatic cylinder actuator systems p35
Neural network-based tracking control for robotic systems using only position feedback p25
New approach to the design of robust tracking and model following controllers for uncertain delay systems p472
New computational procedure to the pole placement problem by static output feedback p466
New efficient frequency domain algorithm for H_∞ approximation with applications to controller reduction p383
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Optimal tuning of PID controllers for integral and unstable processes p180
Predictive PID controllers p478
Right coprime factorisations using system upper Hessenberg forms - the multi-input system case p433
Robust H_∞ filtering for polytopic uncertain systems via convex optimisation p55
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust PI and PID controller design in delta domain p350
Robust root clustering of interval plants with first-order compensators p315
Robust stability of singularly perturbed state feedback systems using unified approach p391
Sensitivity models for nonlinear filters with application to recursive parameter estimation for nonlinear state-space models p137
Time-domain based design and analysis of new PID tuning rules p251
Tuning of PID controllers with fuzzy logic p1
Zero-placement approach to the design of sliding surfaces for linear multivariable systems p333

CONTROL SYSTEM STABILITY

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Adaptive learning controller for autonomous mobile robots p49
Adaptive stabilisation of extended nonlinear output feedback systems p268
Analysis and design of haptic telerobotic system p306
Automotive engine speed control: A robust nonlinear control framework p81
Conjecture about the absolute stability problems of SIMO and MISO systems and a proof of its deduction p299
Criteria for asymptotic stability of a class of neutral systems via a LMI approach p442
Dynamic position feedback stabilisation of multi-degrees-of-freedom linear mechanical systems subject to nonsmooth impacts p488
Exponential and BIBS stabilisation of one degree of freedom mechanical systems subject to single non-smooth impacts p147
Extreme stability margins of interval systems p70
Feedback linearisation of nonminimum singular systems p213
Genetic algorithm approach to designing finite-precision controller structures p377
Improved proximate time-optimal sliding-mode control of hard disk drives p516
Intelligent backstepping control for linear induction motor drive p193
Inverse control of systems with hysteresis and creep p185
Inversion of matrices and matrix functions as a nonlinear discrete system: stability and sensitivity analysis p43
LMI approach to delay-dependent robust stability for uncertain time-delay systems p209
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245
Modelling study, analysis and robust servo control of pneumatic cylinder actuator systems p35
Neural network-based tracking control for robotic systems using only position feedback p25
New approach to the design of robust tracking and model following controllers for uncertain delay systems p472
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Numerical conditioning of delta-domain Lyapunov and Riccati equations p497
Optimal tuning of PID controllers for integral and unstable processes p180
Predictive PID controllers p478
Receding horizon output feedback control for linear systems with input saturation p109
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust PI and PID controller design in delta domain p350
Robust root clustering of interval plants with first-order compensators p315
Robust stabilisation of uncertain time-delay systems containing saturating actuators p323
Robust stability of singularly perturbed state feedback systems using unified approach p391
Switching on the derivative of control to reduce chatter p88

CONTROL SYSTEM SYNTHESIS

Analysis and design of haptic telerobotic system p306
Automotive engine speed control: A robust nonlinear control framework p81
Box-Jenkins model LQG controller: design and performance p419
Design of feedback controllers for paraplegic standing p97
Discrete control for a computer hard disk by using a fractional order hold device p117
Genetic algorithm approach to designing finite-precision controller structures p377
Global output regulation with minimum information of uncertain nonlinear systems subject to exogenous signals p203
Integrated approach to dynamical order assignment in linear descriptor systems p329
Intelligent backstepping control for linear induction motor drive p193
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245
Method for designing PI-type fuzzy controllers for induction motor drives p61

Modelling study, analysis and robust servo control of pneumatic cylinder actuator systems p35
New approach to the design of robust tracking and model following controllers for uncertain delay systems p472
Optimal tuning of PID controllers for integral and unstable processes p180
Predictive PID controllers p478
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust PI and PID controller design in delta domain p350
Time-domain based design and analysis of new PID tuning rules p251
Zero-placement approach to the design of sliding surfaces for linear multivariable systems p333

DIELECTRIC MATERIALS AND DEVICES

Inverse control of systems with hysteresis and creep p185

DIGITAL TECHNIQUES

Discrete control for a computer hard disk by using a fractional order hold device p117
Improved proximate time-optimal sliding-mode control of hard disk drives p516

DISCRETE SYSTEMS

Criteria for asymptotic stability of a class of neutral systems via a LMI approach p442
Discrete control for a computer hard disk by using a fractional order hold device p117
Discrete time Hammerstein model identification with unknown but bounded errors p523
Genetic algorithm approach to designing finite-precision controller structures p377
Improved proximate time-optimal sliding-mode control of hard disk drives p516
Inverse control of systems with hysteresis and creep p185
Inversion of matrices and matrix functions as a nonlinear discrete system: stability and sensitivity analysis p43
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels [Comments and author's reply] p539
New efficient frequency domain algorithm for H∞ approximation with applications to controller reduction p383
Numerical conditioning of delta-domain Lyapunov and Riccati equations p497
Robust optimal guaranteed cost control for 2D discrete systems p355
Switching on the derivative of control to reduce chatter p88

DISTRIBUTED PARAMETER SYSTEMS

Computing frequency response gains of linear continuous-time periodic systems p291
Criteria for asymptotic stability of a class of neutral systems via a LMI approach p442
LMI approach to delay-dependent robust stability for uncertain time-delay systems p209
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
New approach to the design of robust tracking and model following controllers for uncertain delay systems p472
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust stabilisation of uncertain time-delay systems containing saturating actuators p323
Time-domain based design and analysis of new PID tuning rules p251

DRIVES

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Intelligent backstepping control for linear induction motor drive p193
Method for designing PI-type fuzzy controllers for induction motor drives p61
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217

ELECTRIC MACHINES

Intelligent backstepping control for linear induction motor drive p193
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217

ELECTRIC VARIABLES CONTROL

Power control of a photovoltaic array in a hybrid electric generation system using sliding mode techniques p448

ENERGY CONVERSION

Power control of a photovoltaic array in a hybrid electric generation system using sliding mode techniques p448

ENGINEERING COMPUTING

Intelligent backstepping control for linear induction motor drive p193
Temperature control in liquid helium cryostat using self-learning neurofuzzy controller p233

EXPERT SYSTEMS

Neuro-fuzzy mixture of experts network parallel learning and model construction algorithms p456

FEEDBACK

Adaptive stabilisation of extended nonlinear output feedback systems p268
Conjecture about the absolute stability problems of SIMO and MISO systems and a proof of its deduction p299
Control of free length when coiling a helical spring p239
Design of feedback controllers for paraplegic standing p97
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Intelligent backstepping control for linear induction motor drive p193
Neural network-based tracking control for robotic systems using only position feedback p25
New computational procedure to the pole placement problem by static output feedback p466
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Receding horizon output feedback control for linear systems with input saturation p109
Robust root clustering of interval plants with first-order compensators p315
Zero-placement approach to the design of sliding surfaces for linear multivariable systems p333

FILTERS AND FILTERING

Poles and zeros of α-β and α-β-γ tracking filters p370

FORMAL LOGIC

Identification of fuzzy models with the aid of evolutionary data granulation p406
Tuning of PID controllers with fuzzy logic p1

FUZZY CONTROL

Control of free length when coiling a helical spring p239
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Intelligent backstepping control for linear induction motor drive p193
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
Method for designing PI-type fuzzy controllers for induction motor drives p61
Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169
Tuning of PID controllers with fuzzy logic p1

MATHEMATICAL TECHNIQUES

Box-Jenkins model LQG controller: design and performance p419
Cascade nonlinear observers: application to an experimental induction motor benchmark p509
Criteria for asymptotic stability of a class of neutral systems via a LMI approach p442
Eigenstructure assignment design for proportional-integral observers: continuous-time case p263
Identification of fuzzy models with the aid of evolutionary data granulation p406
Identification of processes with direction-dependent dynamics p362
Integrated approach to dynamical order assignment in linear descriptor systems p329
Inverse control of systems with hysteresis and creep p185
Inversion of matrices and matrix functions as a nonlinear discrete system: stability and sensitivity analysis p43
LMI approach to delay-dependent robust stability for uncertain time-delay systems p209
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
MIMO system invertibility and decoupling control strategies based on ANN αth-order inversion p125
New computational procedure to the pole placement problem by static output feedback p466
Numerical conditioning of delta-domain Lyapunov and Riccati equations p497
Receding horizon output feedback control for linear systems with input saturation p109
Right coprime factorisations using system upper Hessenberg forms - the multi-input system case p433
Robust H∞ filtering for polytopic uncertain systems via convex optimisation p55
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust stabilisation of uncertain time-delay systems containing saturating actuators p323

MULTIVARIABLE CONTROL SYSTEMS

Automotive engine speed control: A robust nonlinear control framework p81
Improved proximate time-optimal sliding-mode control of hard disk drives p516
Krein space approach to decentralised H∞ state estimation p502
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels [Comments and author's reply] p539
MIMO system invertibility and decoupling control strategies based on ANN αth-order inversion p125
New computational procedure to the pole placement problem by static output feedback p466
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Power control of a photovoltaic array in a hybrid electric generation system using sliding mode techniques p448
Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169
Switching on the derivative of control to reduce chatter p88
Zero-placement approach to the design of sliding surfaces for linear multivariable systems p333

NEURAL NETWORKS

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Fault detection and accommodation in dynamic systems using adaptive neuro-fuzzy systems p283
Intelligent backstepping control for linear induction motor drive p193
MIMO system invertibility and decoupling control strategies based on ANN αth-order inversion p125
Neural network-based tracking control for robotic systems using only position feedback p25
Neuro-fuzzy mixture of experts network parallel learning and model construction algorithms p456

Neurofuzzy design and model construction of nonlinear dynamical processes from data p530
Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169
Temperature control in liquid helium cryostat using self-learning neurofuzzy controller p233

NONELECTRIC VARIABLES CONTROL

Adaptive learning controller for autonomous mobile robots p49
Analysis and design of haptic telerobotic system p306
Application of parsimonious learning feedforward control to mechatronic systems p318
Automotive engine speed control: A robust nonlinear control framework p81
Control of free length when coiling a helical spring p239
Design of feedback controllers for paraplegic standing p97
Discrete control for a computer hard disk by using a fractional order hold device p117
Improved proximate time-optimal sliding-mode control of hard disk drives p516
Method for designing PI-type fuzzy controllers for induction motor drives p61
Neural network-based tracking control for robotic systems using only position feedback p25
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Sensitivity models for nonlinear filters with application to recursive parameter estimation for nonlinear state-space models p137
Switching on the derivative of control to reduce chatter p88
Temperature control in liquid helium cryostat using self-learning neurofuzzy controller p233

NONLINEAR CONTROL SYSTEMS

Adaptive stabilisation of extended nonlinear output feedback systems p268
Analytic predictive controllers for nonlinear systems with ill-defined relative degree p9
Automotive engine speed control: A robust nonlinear control framework p81
Cascade nonlinear observers: application to an experimental induction motor benchmark p509
Conjecture about the absolute stability problems of SIMO and MISO systems and a proof of its deduction p299
Constructing networks of continuous-time velocity-based models p397
Exponential and BIBS stabilisation of one degree of freedom mechanical systems subject to single non-smooth impacts p147
Feedback linearisation of nonminimum singular systems p213
Global output regulation with minimum information of uncertain nonlinear systems subject to exogenous signals p203
Inverse control of systems with hysteresis and creep p185
Inversion of matrices and matrix functions as a nonlinear discrete system: stability and sensitivity analysis p43
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
MIMO system invertibility and decoupling control strategies based on ANN αth-order inversion p125
Modelling study, analysis and robust servo control of pneumatic cylinder actuator systems p35
Neurofuzzy design and model construction of nonlinear dynamical processes from data p530
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Sensitivity models for nonlinear filters with application to recursive parameter estimation for nonlinear state-space models p137
Switching on the derivative of control to reduce chatter p88

NUMERICAL ANALYSIS

Analytic predictive controllers for nonlinear systems with ill-defined relative degree p9
Application of parsimonious learning feedforward control to mechatronic systems p318
Extreme stability margins of interval systems p70
Identification of fuzzy models with the aid of evolutionary data granulation p406
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Right coprime factorisations using system upper Hessenberg forms - the multi-input system case p433
Robust stabilisation of uncertain time-delay systems containing saturating actuators p323

OPTIMAL CONTROL

Analytic predictive controllers for nonlinear systems with ill-defined relative degree p9
Box-Jenkins model LQG controller: design and performance p419
Genetic algorithm approach to designing finite-precision controller structures p377
Improved proximate time-optimal sliding-mode control of hard disk drives p516
Krein space approach to decentralised H_∞ state estimation p502
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels [Comments and author's reply] p539
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245
Neural network-based tracking control for robotic systems using only position feedback p25
New efficient frequency domain algorithm for H_∞ approximation with applications to controller reduction p383
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Numerical conditioning of delta-domain Lyapunov and Riccati equations p497
Optimal tuning of PID controllers for integral and unstable processes p180
Predictive PID controllers p478
Robust optimal guaranteed cost control for 2D discrete systems p355
Robust stability of singularly perturbed state feedback systems using unified approach p391

OPTIMISATION

Identification of fuzzy models with the aid of evolutionary data granulation p406
Intelligent backstepping control for linear induction motor drive p193
New efficient frequency domain algorithm for H_∞ approximation with applications to controller reduction p383
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Robust H_∞ filtering for polytopic uncertain systems via convex optimisation p55
Tuning of PID controllers with fuzzy logic p1

PARALLEL PROCESSING

Neuro-fuzzy mixture of experts network parallel learning and model construction algorithms p456

PARAMETER ESTIMATION

Constructing networks of continuous-time velocity-based models p397
Discrete time Hammerstein model identification with unknown but bounded errors p523
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273

POWER SYSTEM CONTROL

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Application of parsimonious learning feedforward control to mechatronic systems p318
Automotive engine speed control: A robust nonlinear control framework p81
Cascade nonlinear observers: application to an experimental induction motor benchmark p509
Intelligent backstepping control for linear induction motor drive p193
Method for designing PI-type fuzzy controllers for induction motor drives p61
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Power control of a photovoltaic array in a hybrid electric generation system using sliding mode techniques p448

POWER SYSTEMS AND PLANTS

Power control of a photovoltaic array in a hybrid electric generation system using sliding mode techniques p448

PREDICTIVE CONTROL

Analytic predictive controllers for nonlinear systems with ill-defined relative degree p9
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels [Comments and author's reply] p539
Nonlinear constrained predictive control applied to a coupled-tanks apparatus p17
Predictive PID controllers p478

ROBOTICS

Adaptive learning controller for autonomous mobile robots p49
Analysis and design of haptic telerobotic system p306
Neural network-based tracking control for robotic systems using only position feedback p25
Switching on the derivative of control to reduce chatter p88

SELF-ADJUSTING SYSTEMS

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Adaptive learning controller for autonomous mobile robots p49
Adaptive stabilisation of extended nonlinear output feedback systems p268
Control of free length when coiling a helical spring p239
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Temperature control in liquid helium cryostat using self-learning neurofuzzy controller p233

SENSORS AND ACTUATORS

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Control of free length when coiling a helical spring p239
Inverse control of systems with hysteresis and creep p185

SIGNAL PROCESSING

Identification of processes with direction-dependent dynamics p362
Krein space approach to decentralised H_∞ state estimation p502
Poles and zeros of α-β and α-β-γ tracking filters p370
Robust H_∞ filtering for polytopic uncertain systems via convex optimisation p55
Sensitivity models for nonlinear filters with application to recursive parameter estimation for nonlinear state-space models p137

SIMULATION, MODELLING AND IDENTIFICATION

Cascade nonlinear observers: application to an experimental induction motor benchmark p509
Constructing networks of continuous-time velocity-based models p397
Discrete time Hammerstein model identification with unknown but bounded errors p523
Dynamic position feedback stabilisation of multi-degrees-of-freedom linear mechanical systems subject to nonsmooth impacts p488
Eigenstructure assignment design for proportional-integral observers: continuous-time case p263
Fault detection and accommodation in dynamic systems using adaptive neuro-fuzzy systems p283
Identification of fuzzy models with the aid of evolutionary data granulation p406
Identification of processes with direction-dependent dynamics p362

Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Intelligent backstepping control for linear induction motor drive p193
Krein space approach to decentralised H∞ state estimation p502
Method for designing PI-type fuzzy controllers for induction motor drives p61
Neural network-based tracking control for robotic systems using only position feedback p25
Nonlinear decoupled control for linear induction motor servo-drive using the sliding-mode technique p217
Receding horizon output feedback control for linear systems with input saturation p109
Sensitivity models for nonlinear filters with application to recursive parameter estimation for nonlinear state-space models p137

SOFTWARE TECHNIQUES

Fault detection and accommodation in dynamic systems using adaptive neuro-fuzzy systems p283

STATISTICAL ANALYSIS

Box-Jenkins model LQG controller: design and performance p419
Identification of fuzzy models with the aid of evolutionary data granulation p406
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245
Neuro-fuzzy mixture of experts network parallel learning and model construction algorithms p456
Sensitivity models for nonlinear filters with application to recursive parameter estimation for nonlinear state-space models p137

SYNCHRONOUS MACHINES

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156

SYSTEMS THEORY

Adaptive hybrid control using a recurrent neural network for a linear synchronous motor servo-drive system p156
Adaptive learning controller for autonomous mobile robots p49
Analysis and design of haptic telerobotic system p306
Application of parsimonious learning feedforward control to mechatronic systems p318
Constructing networks of continuous-time velocity-based models p397
Fault detection and accommodation in dynamic systems using adaptive neuro-fuzzy systems p283
Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169

TIME-VARYING SYSTEMS

Box-Jenkins model LQG controller: design and performance p419
Computing frequency response gains of linear continuous-time periodic systems p291
Conjecture about the absolute stability problems of SIMO and MISO systems and a proof of its deduction p299
Indirect model reference adaptive fuzzy control of dynamic fuzzy-state space model p273
Krein space approach to decentralised H∞ state estimation p502
LMI-based quadratic stability analysis for hierarchical fuzzy systems p340
Lyapunov-based controller design for bounded dynamic stochastic distribution control p245

TRANSPORTATION

Reactive parking control of nonholonomic vehicles via a fuzzy learning automaton p169
